

Storey Huntley Storeyjh@umich.edu (248) 550-1809 linkedin.com/in/storeyhuntley storeyh.github.io U.S. Citizen Aerospace Engineering Student — University of Michigan — Rocket Propulsion Focus	
EDUCATION	
University of Michigan, Ann Arbor 2025 - 2029 (Expected) B.S.E. in Aerospace Engineering, College of Engineering Honors Program GPA: 3.7 Relevant coursework: Solid Mechanics & Aerospace Structures (AEROSP 215), Gas Dynamics (AEROSP 225), Systems Engineering & Digital Tools/MBSE (AEROSP 388) Organizations: Michigan Aeronautical Science Association (MASA), American Institute of Aeronautics and Astronautics (AIAA)	
International Academy, Central Campus 2021 - 2025 International Baccalaureate Diploma GPA: 4.4 Magna Cum Laude, National Merit Commended Scholar	
EXPERIENCE	
Instructional Assistant, Engineering 100: Section 980 2026 - Present University of Michigan - Co-teach two lab sections run entirely by instructional assistants; grade student assignments and lab deliverables - Instruct students in breadboarding, PCB design, and C++ to build custom sensor boards measuring acceleration, altitude, temperature, and humidity - Guide students through building and launching Estes model rockets carrying these custom instrumentation payloads	
PROJECTS	
Fuel Flowmeter Flanges 2025 - Present Michigan Aeronautical Science Association (MASA) - Designed, sized, and manufactured a dual-sealed (O-ring + ORB) fuel flowmeter flange for the Limelight rocket in Siemens NX, using hoop-stress calculations to size wall thickness and material - Performed bolted-joint margin-of-safety analysis on the 6-bolt flange joint under 1,050 psi static pressure, verifying positive margins of safety (as low as 10.9%) before pressure- and flow-testing the finished part	
Coldflow Test Campaign - Limelight Winter 2026 Michigan Aeronautical Science Association (MASA) - Supported Limelight's winter coldflow test campaign, executing test procedures and safety protocols during pressurized propellant system testing - Collected and monitored pressure and flow data across test runs, coordinating with propulsion and integration subsystems throughout the campaign	
Igniter Assembly & Integration - Limelight Launch Campaign May 2026 Michigan Aeronautical Science Association (MASA) - Selected as a freshman for Limelight's launch trip team; handled and assembled APCP (ammonium perchlorate composite propellant) igniters and wired the short-circuit ignition system - Mechanically integrated igniters into the rocket engine using nylon rod-and-nut hardware ahead of launch	
Responsible Engineer, Engine Bay - Citron Rocket 2026 - Present Michigan Aeronautical Science Association (MASA) Own subsystem design, integration, and testing for the engine bay of MASA's Citron rocket	
MBOP 1 - Michigan-Blue Origin Payload Project 2026 - Present X88 Systems Engineering Program (AEROSP 288/388/488), in partnership with Blue Origin Develop a payload for Blue Origin's New Glenn rocket as part of a cross-disciplinary, industry-mentored systems engineering team	
Marketing Director 2026 - Present Michigan Aeronautical Science Association (MASA) Direct merchandise, social media, sponsor relations, and department-organization relations for a student rocketry organization	
SKILLS & CERTIFICATIONS	
Technical: Siemens NX, SolidWorks, Teamcenter, MATLAB, C++ Training: Cryogenic & High-Pressure Vessels Training, Wet Lab Training, Plumbing Training, Solid Propellant (APCP) & Igniter Handling (MASA); Basic I & II Workshop Safety (University of Michigan Wilson Center) Certifications: CPR & First Aid (American Red Cross)	
HONORS	
- Arthur B. Singleton Award Nominee - Dean's List (1 semester)
